

Fares Mohamed

Alexandria, Egypt | faresmohamed260@gmail.com | github.com/faresmohamed260
linkedin.com/in/fares-mohamed-b83454194 | **AI Engineer – Agentic AI, LLM Systems, Applied ML**

Summary

Fresh Computer Science graduate ranked first in class (CGPA: 3.97/4.00), building agentic AI systems, retrieval-grounded LLM workflows, and production-minded AI products with Python, LangGraph, FastAPI, React, and cloud-backed data services.

Experience

Armstrong

2023 – 2025

AI & Automation Engineer / Technical Content Creator (Part-time), Alexandria, Egypt

- Built AI-assisted content pipelines for the Digital Egypt Cubs Initiative (DECI), supporting a national technology-education program under Egypt's Ministry of Communications and Information Technology.
- Orchestrated n8n, custom GPTs, open-source models, scripts, and visual-generation tools to produce presentations, teacher guides, videos, and other structured learning assets.
- Developed robotics, AI, Arduino, circuits, and programming curricula; translated engineering concepts into classroom-ready lessons, demonstrations, and instructional media.

Kayfa

Aug 2025 – Dec 2025

AI Subject Matter Expert, Alexandria, Egypt

- Authored implementation-focused lessons, assignments, and Python notebooks covering machine learning, neural networks, CNNs, clustering, anomaly detection, and unsupervised learning.
- Connected theory to practical model-building workflows through exercises, visual explanations, and structured technical assessments.

Engineering for Kids-Egypt

2023 – 2025

AI & Robotics Instructor (Seasonal), Alexandria, Egypt

- Taught students aged 11–16 robotics, AI, Arduino, circuits, Python, and C++ through project-based seasonal programs.
- Guided hardware/software builds from circuit assembly and sensor integration to programming, testing, debugging, and live demonstrations.

Projects

SAGA: Agentic Narrative Intelligence Platform

Python, LangGraph, FastAPI, React, Supabase/Postgres, pgvector, Modal
github.com/faresmohamed260/saga

- Built a multi-stage system that ingests EPUB/PDF books and extracts grounded scenes, identities, entities, events, relationships, timelines, character state, and reusable canon memory.
- Architected LangGraph agents around typed tool contracts, hybrid retrieval, persistent checkpoints, structured traces, and resumable jobs; added automated validation for core runtime paths.
- Delivered a React + FastAPI operator dashboard and modular services for Supabase/pgvector persistence, web search, Modal GPU workloads, ComfyUI visual generation, and audiobook workflows.

DUM-E: ESP32 Robotic Arm Platform

Python, C++, ESP32, Streamlit, Robotics
github.com/faresmohamed260/DUM-E

- Built an operator-controlled robotic arm platform with calibration, manual control, sequence recording, and repeatable task execution.
- Combined ESP32 firmware, a Streamlit interface, controller mapping, and FK/IK-assisted motion planning for guarded pick-and-place demonstrations.

Education

Alexandria University, Faculty of Computer and Data Science

2022 – 2026

B.Sc. Computer Science (Intelligent Systems) | **Class Rank: 1st** | **CGPA: 3.97/4.00**

Skills

Engineering: Python, C++, FastAPI, React, Streamlit, SQL, Docker, pytest, Git, REST APIs

AI Systems: LangGraph, LLM orchestration, tool calling, structured outputs, RAG, hybrid retrieval, prompt engineering, NLP, computer vision

Data & Infrastructure: PostgreSQL, Supabase, pgvector, SQLite, SQLAlchemy, Modal, ComfyUI, n8n

Embedded: Arduino, ESP32, sensors, circuits, FK/IK-assisted motion workflows | **Languages:** Arabic, English

Leadership & Certifications

Head of AI Committee, ElCoder – Led workshops on AI and machine learning fundamentals.

Machine Learning Specialization | Deep Learning Specialization | Google Cloud Big Data and Machine Learning Fundamentals
