

Fares Mohamed

Alexandria, Egypt | faresmohamed260@gmail.com | github.com/faresmohamed260
linkedin.com/in/fares-mohamed-b83454194 | **Machine Learning Engineer – Generative AI, NLP, Computer Vision**

Summary

Fresh Computer Science graduate ranked first in class (CGPA: 3.97/4.00), experienced in applied machine learning, LLM orchestration, multimodal systems, and production-minded AI pipelines from experimentation through interactive delivery.

Experience

Armstrong

2023 – 2025

AI & Automation Engineer / Technical Content Creator (Part-time), Alexandria, Egypt

- Built AI-assisted content pipelines for the Digital Egypt Cubs Initiative (DECI), supporting a national technology-education program under Egypt's Ministry of Communications and Information Technology.
- Combined n8n, custom GPTs, open-source models, scripts, and visual-generation tools to automate presentations, teacher guides, videos, and structured learning assets.
- Created classroom-ready curricula and instructional media across AI, robotics, Arduino, circuits, and programming.

Kayfa

Aug 2025 – Dec 2025

AI Subject Matter Expert, Alexandria, Egypt

- Authored lessons, assignments, and Python notebooks on ML, neural networks, CNNs, clustering, anomaly detection, and unsupervised learning.
- Designed implementation-focused exercises and technical assessments that connected mathematical concepts to model-building workflows.

Engineering for Kids-Egypt

2023 – 2025

AI & Robotics Instructor (Seasonal), Alexandria, Egypt

- Taught students aged 11–16 AI, robotics, Python, C++, Arduino, and circuits through project-based seasonal programs.
- Coached teams through requirements, implementation, debugging, and demonstrations of integrated hardware/software projects.

Projects

SAGA: Agentic Narrative Intelligence Platform

Python, LangGraph, NLP, RAG, FastAPI, Supabase/Postgres, pgvector

github.com/faresmohamed260/saga

- Built an NLP pipeline that ingests EPUB/PDF books and produces grounded scenes, identity clusters, entities, events, relationships, timelines, character state, and reusable canon memory.
- Implemented typed LangGraph agents, hybrid semantic retrieval, schema-constrained outputs, persistent checkpoints, evaluation scripts, and real-provider integration tests.
- Productized the system through a React + FastAPI dashboard and modular Supabase/pgvector, Modal GPU, ComfyUI, and audiobook service layers.

VisionDeck Computer Vision Suite

Python, OpenCV, MediaPipe, YOLO, Streamlit

- Developed a modular real-time dashboard for face detection, hand-gesture recognition, and object detection.
- Supported webcam and Android IP-camera feeds to streamline live testing, comparison, and demonstrations.

Education

Alexandria University, Faculty of Computer and Data Science

2022 – 2026

B.Sc. Computer Science (Intelligent Systems) | **Class Rank: 1st** | **CGPA: 3.97/4.00**

Skills

ML & AI: scikit-learn, neural networks, CNNs, NLP, computer vision, RAG, hybrid retrieval, LLM orchestration, LoRA, diffusion models

Engineering: Python, C++, LangGraph, FastAPI, React, Streamlit, Docker, pytest, Git, REST APIs

Data & Platforms: PostgreSQL, Supabase, pgvector, SQLite, SQLAlchemy, Modal, ComfyUI, n8n | **Languages:** Arabic, English

Leadership & Certifications

Head of AI Committee, ElCoder – Led workshops on AI and ML fundamentals. | Machine Learning Specialization | Deep Learning Specialization

| Google Cloud Big Data and ML Fundamentals
