AI Subject Matter Expert – Technical Instructor – Curriculum Developer

Professional Summary

Computer Science graduate ranked first in class with experience creating and delivering implementation-focused AI, machine learning, robotics, and programming education. Develops structured curricula, lessons, assignments, Python notebooks, presentations, technical guides, and project-based labs that connect theory to practical engineering workflows for learners and instructors.

Core Competencies

Instruction: Technical instruction, subject matter expertise, curriculum development, lesson planning, technical writing, workshops, project-based learning, learner exercises, assessments, demonstrations

Subject Areas: Artificial intelligence, machine learning, deep learning, neural networks, CNNs, clustering, anomaly detection, NLP, computer vision, robotics, Arduino, circuits, Python, C++

Teaching, SME & Content Experience

Armstrong 2023–2025

AI & Automation Engineer / Technical Content Creator (Part-time)

- Built AI-assisted content pipelines for the Digital Egypt Cubs Initiative, a national technology-education program under Egypt's Ministry of Communications and Information Technology.
- Developed structured AI, robotics, Arduino, circuits, and programming curricula, instructional guides, presentations, videos, and classroom-ready learning assets.
- Used n8n, custom GPTs, open-source models, scripts, and visual-generation tools to support consistent educational-content production.

Kayfa Aug–Dec 2025

AI Subject Matter Expert

- Authored implementation-focused lessons, assignments, and Python notebooks covering machine learning, neural networks, CNNs, clustering, anomaly detection, and unsupervised learning.
- Connected theory to practical model-building workflows through exercises, visual explanations, and structured technical assessments.

Engineering for Kids-Egypt 2023–2025

AI & Robotics Instructor (Seasonal)

- Taught students aged 11–16 robotics, AI, Arduino, circuits, Python, and C++ through hands-on, project-based seasonal programs.
- Guided builds from circuit assembly and sensor integration through programming, testing, debugging, and demonstrations.

Applied Technical Portfolio

SAGA – Narrative Intelligence Platform: Builds practical subject depth in NLP, evaluation, evidence-grounded extraction, agent workflows, and structured outputs.

RenderLab – AI Image/Video Workspace: Production-domain closed beta demonstrating generative AI, workflow automation, secure access, reliability, and full-stack product engineering.

Fares Uniform – Experimental ERP & Public Website: Demonstrates applied software engineering, business workflows, testing, bilingual product design, and technical documentation.

Education

Alexandria University, Faculty of Computer and Data Science 2022–2026

B.Sc. Computer Science (Intelligent Systems) | **Class Rank: 1st**

Technical Skills & Certifications

Tools: Python, C++, PyTorch, scikit-learn, OpenCV, MediaPipe, Ultralytics YOLO, Streamlit, Jupyter, FastAPI, Git, Docker, SQL, Arduino, ESP32, n8n

AI Systems: LLM orchestration, RAG, prompt engineering, tool calling, structured outputs, evaluation workflows, Google AgentSpace

Certifications: Machine Learning Specialization; Deep Learning Specialization; Google Cloud Big Data and Machine Learning Fundamentals | **Languages:** Arabic, English
