Fares Mohamed

Alexandria, Egypt | faresmohamed260@gmail.com | github.com/faresmohamed260
linkedin.com/in/fares-mohamed-b83454194 | **Agentic AI Systems Engineer**

Summary

Computer Science graduate ranked first in class, specializing in contract-driven agents, durable AI jobs, tool orchestration, evidence-grounded reasoning, retrieval, and multimodal systems designed for failure recovery and production operations.

Experience

Armstrong 2023–2025
AI & Automation Engineer / Technical Content Creator (Part-time)

- Orchestrated n8n, custom GPTs, open-source models, scripts, and visual-generation tools into reviewed pipelines for presentations, guides, videos, and structured educational assets.
- Translated AI, robotics, Arduino, circuits, and programming topics into repeatable curricula and demonstrations.

Kayfa Aug–Dec 2025
AI Subject Matter Expert

- Authored implementation-focused ML lessons, assignments, assessments, and Python notebooks spanning neural networks, CNNs, clustering, and anomaly detection.

Engineering for Kids-Egypt 2023–2025
AI & Robotics Instructor (Seasonal)

- Taught and mentored end-to-end AI/robotics builds for students aged 11–16.

Selected Projects

S.A.G.A. – Evidence-Grounded Narrative Agents
Python, LangGraph, FastAPI, Supabase/Postgres, B2

- Designed durable jobs, leases, immutable runs, provider-neutral tools, provenance, and a local-first evidence cascade for characters, dialogue, events, relationships, state, and time.
- Built measurable promotion gates so model output remains evidence rather than silently becoming canon truth; current v2 still requires APIs and qualification before end-to-end operation.

RenderLab – Durable Multimodal Job Platform
Next.js, Supabase, R2, ComfyUI, Modal

- Implemented browser-independent generation reconciliation, idempotent finalization, cancellation races, retries, failover, durable media/continuations, admission control, observability, and guarded production releases.

Fares Uniform – Contract-Driven Business Automation
Odoo, Python, Next.js, PostgreSQL, Playwright

- Modeled offline POS, preorders/payments, production and B2B workflows behind server-enforced roles; verified synthetic UAT, exact-once effects, recovery, WebSocket replay, cron locking, and staging observability.

DUM-E – Robotic Arm Control Workflows
Python, C++, ESP32, Streamlit

- Built guarded device actions, calibration, controller mapping, reusable sequences, and FK/IK-assisted pick-and-place execution.

Education

Alexandria University, Faculty of Computer and Data Science 2022–2026
B.Sc. Computer Science (Intelligent Systems) | **Class Rank: 1st**

Skills

Agentic Systems: LangGraph, tool calling, structured outputs, checkpoints, durable jobs, RAG, hybrid retrieval, provenance
Engineering: Python, C++, FastAPI, Next.js/React, SQL, Docker, pytest, Playwright, REST APIs
Infrastructure/Media: PostgreSQL, Supabase, pgvector, B2, R2, Modal, ComfyUI, Vercel, n8n | **Languages:** Arabic, English

Certifications

Machine Learning Specialization | Deep Learning Specialization | Google Cloud Big Data & ML Fundamentals
