

Fares Mohamed

Alexandria, Egypt | faresmohamed260@gmail.com | GitHub | LinkedIn | Hugging Face | Kaggle

ML Engineer | Generative AI, Applied Machine Learning, and Intelligent Pipelines

Summary

Senior AI student at Alexandria University with hands-on experience building AI automation workflows, multimodal systems, and scalable content pipelines. Focused on applied machine learning, LLM orchestration, computer vision, and production-minded AI systems.

Experience

Armstrong

AI and Automation Engineer

Jul 2024 – Present

Alexandria, Egypt

- Led AI automation work for the Digital Egypt Cubs Initiative (DECI), a national program under Egypt's Ministry of Communications and Information Technology.
- Built workflows using n8n, CustomGPTs, and open-source models to automate educational presentations, teacher guides, and video generation at scale.
- Designed repeatable pipelines that reduced manual effort, improved delivery speed, and standardized output quality across schools.

Armstrong

Content Creator

Aug 2024 – Present

Alexandria and Cairo, Egypt

- Developed structured technical content covering AI, robotics, Arduino, and programming for international school programs.

Engineering for Kids

Technical Instructor

Jun 2023 – Present

Alexandria, Egypt

- Taught AI, robotics, Python, C++, circuits, and Arduino through project-based STEM instruction for students aged 11–16.

Projects

SAGA: Narrative Intelligence System

Python, Streamlit, LLM Pipelines, RAG

- Built a structured narrative intelligence pipeline that ingests EPUB and PDF books, segments scenes, and extracts reusable knowledge for downstream story analysis and generation.
- Generated entity registries, canon snapshots, timeline events, causal graph outputs, and searchable indexes for grounded narrative workflows.

VisionDeck CV Suite

Python, OpenCV, MediaPipe, YOLO, Streamlit

- Developed a modular computer vision dashboard combining face detection, hand gesture recognition, and real-time object detection in one application.
- Added support for webcam and Android IP camera feeds to simplify live testing and demos.

Stable Diffusion LoRA Fine-Tuning

Diffusion Models, LoRA, Generative AI

- Fine-tuned custom LoRA models using curated datasets and diffusion-based workflows, with experimentation across Flux.1 and Stable Diffusion architectures.

Education

Alexandria University, Faculty of Computer and Data Science

B.Sc. in Computer Science (Intelligent Systems)

2022 – 2026

Alexandria, Egypt

Leadership

ElCoder

Head of AI Committee

Alexandria, Egypt

- Led student workshops and technical sessions on AI and ML fundamentals.

Skills

Languages and Tools: Python, C++, Docker, n8n, Streamlit, Arduino

Machine Learning: LLM systems, RAG pipelines, NLP, computer vision, multimodal systems, Stable Diffusion, LoRA fine-tuning, workflow automation

Focus Areas: Generative AI, applied ML, AI pipelines, educational content automation

Certifications

Machine Learning Specialization | Deep Learning Specialization | Google Cloud Big Data and Machine Learning Fundamentals
