AI Engineer – Applied AI, Machine Learning, Automation & Intelligent Systems

Professional Summary

Computer Science graduate ranked first in class with hands-on experience across agentic and LLM systems, machine learning, computer vision, generative AI, intelligent automation, robotics, and full-stack AI products. Builds end-to-end systems from model/workflow design through APIs, data layers, testing, deployment, and user-facing applications, with additional experience in technical instruction and AI content development.

Core Technical Strengths

AI & ML: LangGraph, LLM orchestration, tool calling, structured outputs, RAG, prompt engineering, NLP, computer vision, evaluation workflows, PyTorch, scikit-learn
Engineering: Python, C++, FastAPI, React, Next.js, TypeScript, SQL, REST APIs, Docker, pytest, Playwright, Git, CI/CD concepts
Platforms & Applied Systems: PostgreSQL, Supabase, pgvector, Modal, Cloudflare R2, Vercel, n8n, ComfyUI, OpenCV, YOLO, MediaPipe, Arduino, ESP32

Experience

Armstrong 2023–2025
AI & Automation Engineer / Technical Content Creator (Part-time)

- Built AI-assisted content pipelines for the Digital Egypt Cubs Initiative using n8n, custom GPTs, open-source models, scripts, and visual-generation tools to produce structured learning assets.
- Developed AI, robotics, Arduino, circuits, and programming curricula, technical guides, presentations, and instructional media.

Kayfa Aug–Dec 2025
AI Subject Matter Expert

- Authored implementation-focused ML lessons, assignments, and Python notebooks covering neural networks, CNNs, clustering, anomaly detection, and unsupervised learning, connecting theory to practical model-building workflows.

Engineering for Kids-Egypt 2023–2025
AI & Robotics Instructor (Seasonal)

- Taught students aged 11–16 robotics, AI, Arduino, circuits, Python, and C++ through hands-on projects spanning hardware assembly, programming, testing, and debugging.

Selected Technical Portfolio

SAGA – Agentic Narrative Intelligence Platform
Python, NLP, FastAPI, LangGraph, PostgreSQL/Supabase

- Architected an evidence-grounded narrative-analysis platform for characters, dialogue, events, relationships, state, and time, with durable jobs, provenance, structured contracts, and measurable evaluation workflows.

RenderLab – AI Image/Video Creation Platform
Next.js, TypeScript, Supabase, ComfyUI, Modal, Cloudflare R2

- Built a production-domain closed beta with durable generation reconciliation, media workflows, retry/cancel/failover, secure identity and MFA, authorization, observability, and guarded release validation.

Fares Uniform – Experimental ERP & Public Website
Python, Odoo, Next.js, PostgreSQL, Playwright

- Engineered bilingual business workflows spanning offline POS, inventory, preorders, payments, production handoff, B2B operations, public catalog experiences, automated testing, and staging qualification.

Robotics & Computer Vision Systems
Python, C++, ESP32, OpenCV, MediaPipe, YOLO, Streamlit

- Built robotic control and computer-vision systems with servo calibration, pose sequencing, FK/IK-assisted motion, live camera input, object/gesture detection, tracking, and vision-guided behavior.

Education & Leadership

Alexandria University, Faculty of Computer and Data Science 2022–2026
B.Sc. Computer Science (Intelligent Systems) | **Class Rank: 1st**
Head of AI Committee, ElCoder – Led workshops on AI and machine-learning fundamentals. | **Languages:** Arabic, English

Certifications

Machine Learning Specialization | Deep Learning Specialization | Google Cloud Big Data and Machine Learning Fundamentals
