Academic Profile

Computer Science graduate specializing in Intelligent Systems, ranked first with a 3.97/4.00 CGPA. Interested in reliable artificial intelligence, natural language processing, agentic systems, computer vision, and applied machine learning. Builds evidence-grounded AI systems and evaluates them with explicit metrics, provenance, and failure-aware engineering.

Education

Alexandria University, Faculty of Computer and Data Science 2022–2026
B.Sc. Computer Science (Intelligent Systems) **CGPA: 3.97/4.00; Class Rank: 1st**

Research and Technical Interests

Natural language processing; data science; large language models and agentic workflows; information retrieval; AI evaluation and reliability; computer vision; generative AI; intelligent robotics.

Selected Projects

SAGA – Agentic Narrative Intelligence Platform *Python, NLP, LangGraph, FastAPI, PostgreSQL*

- Designing an evidence-linked platform for extracting characters, dialogue, events, relationships, state, and time from long-form narratives, with durable jobs, provenance, and bounded model use.
- Established evaluation contracts and measured deterministic quote detection at 0.8563 F1 and a BookNLP event-trigger challenger at 0.7791 F1.

RenderLab – AI Image and Video Creation Platform *Next.js, TypeScript, Supabase, ComfyUI, Modal*

- Built a production-domain closed beta integrating cloud-hosted generative-media workflows with durable finalization, retry/cancel/failover, owner-scoped access, and release qualification.

Biped Robot Control System *Python, C++, ESP32, OpenCV, Streamlit*

- Integrated live computer vision with a six-servo biped robot, including automatic device discovery, pose calibration, ball/robot tracking, video diagnostics, and autonomous threshold-based movement.

VisionDeck – Computer Vision Suite *Python, OpenCV, MediaPipe, YOLOv8*

- Developed a dashboard for face landmarks, real-time hand tracking and gesture recognition, object detection, webcam/IP-camera input, and custom YOLOv8 fine-tuning.

Professional and Teaching Experience

Kayfa Aug–Dec 2025
AI Subject Matter Expert

- Authored implementation-focused lessons, assignments, and Python notebooks on machine learning, neural networks, CNNs, clustering, anomaly detection, and unsupervised learning.

Armstrong 2023–2025
AI & Automation Engineer / Technical Content Creator (Part-time)

- Built AI-assisted content pipelines and developed AI, robotics, programming, and electronics curricula for a national technology-education program.

Engineering for Kids-Egypt 2023–2025
AI & Robotics Instructor (Seasonal)

- Taught learners aged 11–16 through hands-on Python, C++, Arduino, circuits, AI, and robotics projects.

Technical Skills

AI/ML: LangGraph, LLM orchestration, RAG, NLP, computer vision, OpenCV, MediaPipe, YOLO, evaluation workflows
Engineering: Python, C++, SQL, FastAPI, React, Next.js, TypeScript, Docker, pytest, REST APIs, Git
Data/Cloud: PostgreSQL, Supabase, pgvector, Cloudflare R2, Backblaze B2, Modal, Vercel, n8n
Languages: Arabic (native), English (professional working proficiency)

Certifications

Machine Learning Specialization | Deep Learning Specialization | Google Cloud Big Data and Machine Learning Fundamentals
